

Claims

What is claimed is:

- [c1] A method for making a scented media, comprising:
 - forming an elastomeric material;
 - adding a scented material to the elastomeric material to form the scented media; and
 - curing the scented media.
- [c2] The method of claim 1, where the elastomeric material is polyurethane.
- [c3] The method of claim 1, where the elastomeric material is liquid silicone.
- [c4] The method of claim 3, further comprising:
 - adding silicone oil to the liquid silicone.
- [c5] The method of claim 3, further comprising:
 - adding a curing inhibitor to the scented media to lengthen time required for curing the scented media.
- [c6] The method of claim 3, where the scented material is a liquid concentrate.
- [c7] The method of claim 6, where the amount of scented material added to the elastomeric material is between 5 – 40 % of the volume of the elastomeric material.
- [c8] The method of claim 6, where the amount of scented material added to the elastomeric material is 15 % of the volume of the elastomeric material.
- [c9] The method of claim 1, where the scented media is cured in a mold.
- [c10] The method of claim 1, where the scented media is a deodorant.

- [c11] The method of claim 1, where the scented media is used as a fish attractant.
- [c12] The method of claim 1, where the scented media is used as a game attractant.
- [c13] The method of claim 1, where the scented media is used to mask a hunter's scent.
- [c14] A method for making a scented media, comprising:
 - step for forming an elastomeric material;
 - step for adding a scented material to the elastomeric material to form the scented media; and
 - step for curing the scented media.
